Midwest
Simona Hammond, Iowa

South
Tim Strickland, Florida
Tolling Solely Managed by Sending State

- Number of cases being tolled: 318
- Cases tolled past Supervision End Date*: 169 (53%)
- Cases tolled for more than a year: 14%
- Average days cases are tolled: 86
- Probation cases make up 98% of tolled cases
- Tolling report is rarely used: 16 states accessed in last 60 days

* Not consistent with ICAOS Training on Tolling Feature
Considerations for using the Tolling Feature

• Is the tolling feature used in accordance with your state’s legal authority?
• Are users providing proper documentation in ICOTS?
• Who oversees these cases in the compact office?
• How is your state training on tolling in ICOTS?
Sending States With Tolled Cases in ICOTS

Current as of September 13, 2022

1-10 Cases in Tolling Status
11-20 Cases in Tolling Status
21-30 Cases in Tolling Status
31+ Cases in Tolling Status
Receiving States Supervising Tolled Cases

- Receiving States report difficulty obtaining documentation & communication from sending states
  - Delays/No response
  - Results mixed when elevated:
    - Some provide authority documentation
    - Some find they do not have the authority to utilize feature

- Many cases tolled AFTER invalidating a Case Closure notice resulting in potential supervision gaps
  - Substantial # of these cases are ‘tolled’ for non-payment
Receiving States Supervising Tolled Cases in ICOTS

Past Supervision End Date (Case Closure Due Date)

*Current as of September 13*

1-10 Cases in Tolling Status

11-20 Cases in Tolling Status

21-30 Cases in Tolling Status

31+ Cases in Tolling Status
Commission Considerations to Address Misuse

- Establish New Training Expectations
- Prevent Invalidating Case Closures to toll Management standards

- Rule changes to create standard definition of *tolling* for compact cases (state definitions vary)

- Technology changes to ICOTS
  - Remove feature
  - Enhance management functionality/require documentation
